FAMILYKIT

BRAND SYSTEM | FINAL COLOUR PALETTE & TYPOGRAPHY | APP & WEBSITE

A calm, approachable visual language built around deep purple, complementary accents, balanced neutrals, clear feedback colours and two brand fonts: Poppins for headings, buttons, tabs and amounts, and Mulish for body text. This is the final colour and typography reference for the FamilyKit mobile app (the main product) and the website. Every colour below matches `tokens.css` and `palette.json` exactly; every type value matches `familykit-typography.css`.

VERSION	DATE	OWNER	DEVELOPER FILE
1.2 Final	11 Nov 2026	Medhaara Innovations	familykit-brand.css

How to read this document. Start with the Quick reference below; it covers almost everything a page needs. Sections 01–04 give the full ramps (11 or fewer steps per family, built in OKLCH so each step is an even jump in lightness). **Original** marks a value carried over unchanged from the original colour document. Components should use the role tokens (`--fk-…`), not raw ramp steps. **Section 06 Typography** covers the fonts, type scale, live specimens and type rules; Appendix B has the CSS to load the fonts.

Quick reference: core colours

The colours a developer or designer needs most. Swatch cells are filled with the actual colour.

Use	Swatch	CSS token (ramp step)	Hex	Notes
SURFACES & LINES				
Page background	Aa	`--fk-bg` (neutral-0)	#FFFFFF	Default page. Use bg-subtle #F7F6FA for alternate sections.
Surface (cards, panels)	Aa	`--fk-surface` (neutral-0)	#FFFFFF	White cards on bg-subtle; raised/tinted: #F7F5FD / #EBE6F7.
Border / divider	Aa	`--fk-border` (neutral-200)	#DCD9E2	Inputs and strong outlines: border-strong #BFBCC7.
TEXT				
Heading text	Aa	`--fk-text-heading` (primary-800)	#2D0B84	Original "Main" purple. Headings only.
Body text	Aa	`--fk-text-secondary` (neutral-700)	#4D485A	Original "Dark Grey". 8.79:1 on white.
Strong UI text	Aa	`--fk-text-primary` (neutral-900)	#1B132A	Labels, table text, high emphasis.
Muted text	Aa	`--fk-text-muted` (neutral-600)	#6B6677	Captions, helper text. Lightest allowed text colour (5.54:1).

Use	Swatch	CSS token (ramp step)	Hex	Notes
Link	Aa	`--fk-text-link` (primary-700)	#4A13B7	Same as primary button. Underline links in body copy.
PRIMARY BUTTON (THE ONLY PRIMARY ACTION COLOUR)				
Button: rest	Button	`--fk-primary` (primary-700)	#4A13B7	White label (10.15:1). Kept from the current site.
Button: hover	Hover	`--fk-primary-hover` (primary-800)	#2D0B84	Brand Main purple.
Button: pressed	Pressed	`--fk-primary-pressed` (primary-900)	#21025E	One step darker than hover.
Button: disabled	Disabled	`--fk-disabled-bg` (neutral-100) `--fk-disabled-fg` (neutral-500)	#EDEAF3 #827D8D	Background / label. Disabled controls are exempt from contrast rules.
Focus ring	Focus	`--fk-focus-ring` (lavender-500)	#996DF8	3px ring with a 3px white gap, on every focusable element.
ACCENTS				
Accent fill (lime)	Accent	`--fk-accent` (lime-100)	#EFFF94	Badges, accent button on dark bands. Text on lime is always #130438.
Accent border / hover	Aa	`--fk-accent-strong` (lime-400)	#DAD05A	Original "Yellow", now lime-400. Borders and hover only.
Dark band background	Aa	`--fk-surface-inverse` (primary-950)	#130438	Original "Primary 100". White text on it (19.05:1).
Soft lavender surface	Aa	`--fk-accent-2-subtle` (lavender-100)	#EEE9FF	Chips, soft panels. Lavender-400 #B294FF for avatars/illustration.

Status colours (success, error, warning, info)

Family	Text (-fg)	Fill, white text (-solid)	Banner bg (-bg)	Banner border (-border)
Success	#006C12 success-700	#008816 success-600	#F2FFF3 success-50	#C3EAC5 success-200
Error	#970400 error-700	#B40706 error-600	#FFF8F8 error-50	#FFD1D0 error-200
Warning	#964700 warning-700	#BD5900 warning-600	#FFF8F2 warning-50	#F8D7BD warning-200
Info	#00667A info-700	#00809A info-600	#F2FDFF info-50	#C4E5EC info-200

Banner = -bg background, -border edge, -fg text and an icon in -solid. Text in the Banner bg column is shown in the matching -fg colour. The original base colours (step 500) are for icons, charts and illustration, not text.

Fonts at a glance: Poppins for hierarchy and actions (screen titles, headings, buttons, tabs, ₹ amounts, stats, dates); **Mulish** for reading (body text, labels, captions, helper text). Full app and website type scale in section 06 Typography.

01 Primary colours

The core brand family: Royal Purple. Deep purple is the brand anchor; lighter and darker steps support backgrounds, interaction states and hierarchy. The original Main #2D0B84 sits at step 800 (headings and hover), the current site button #4A13B7 at 700 (buttons and links), and the original 10 and 100 at 100 and 950.

Swatch	Token	Hex	RGB	Usage	Source
50	primary-50 `--fk-primary-50`	#F7F5FD	247, 245, 253	Raised surfaces, row hover (`--fk-surface-raised`)	New step
100	primary-100 `--fk-primary-100`	#EBE6F7	235, 230, 247	Tinted surfaces, selected nav pill, subtle button bg (`--fk-surface-tint`)	**Original: Primary 10**
200	primary-200 `--fk-primary-200`	#D9D0F3	217, 208, 243	Secondary text on dark bands; light tints	New step
300	primary-300 `--fk-primary-300`	#C2B0F0	194, 176, 240	Illustration, charts, decorative tints	New step
400	primary-400 `--fk-primary-400`	#A78EE7	167, 142, 231	Illustration, charts. Not for text	New step
500	primary-500 `--fk-primary-500`	#8B6ADA	139, 106, 218	Illustration, charts. Not for text	New step
600	primary-600 `--fk-primary-600`	#7543C7	117, 67, 199	Lightest purple allowed as text on white; small accents	**Original: Doc text colour**
700	primary-700 `--fk-primary-700`	#4A13B7	74, 19, 183	**Primary button (rest) and links** (`--fk-primary`, `--fk-text-link`)	**Current site button (kept)**
800	primary-800 `--fk-primary-800`	#2D0B84	45, 11, 132	**Headings, button hover** (`--fk-text-heading`, `--fk-primary-hover`)	**Original: Primary Main**
900	primary-900 `--fk-primary-900`	#21025E	33, 2, 94	Button pressed (`--fk-primary-pressed`)	New step
950	primary-950 `--fk-primary-950`	#130438	19, 4, 56	Dark bands and footer bg; text on lime (`--fk-surface-inverse`, `--fk-text-on-accent`)	**Original: Primary 100**

Changed from the original: "75" #3D2184 and "25" #AC9FCC are dropped. 75 was lighter than Main, which broke the ramp order, and 25 was much greyer than its neighbours. They are replaced by the even 11-step ramp above.

02 Secondary colours

Supporting accents add warmth and variety without competing with the primary purple. Lavender is soft and calm; lime is the bright highlight.

Lavender (Accent 2)

Swatch	Token	Hex	RGB	Usage	Source
50	**lavender-50** `--fk-lavender-50`	**#F7F5FF**	247, 245, 255	Very soft background tint	New step
100	**lavender-100** `--fk-lavender-100`	**#EEE9FF**	238, 233, 255	Soft surfaces, chips (`--fk-accent-2-subtle`)	New step
200	**lavender-200** `--fk-lavender-200`	**#DDD3FF**	221, 211, 255	Soft tints, illustration	New step
300	**lavender-300** `--fk-lavender-300`	**#C8B5FF**	200, 181, 255	Soft tints, illustration	New step
400	**lavender-400** `--fk-lavender-400`	**#B294FF**	178, 148, 255	Avatars, illustration (`--fk-accent-2`)	**Original: Accent 2 Lavender**
500	**lavender-500** `--fk-lavender-500`	**#996DF8**	153, 109, 248	**Focus ring and focus border** (`--fk-focus-ring`)	New step
600	**lavender-600** `--fk-lavender-600`	**#8049E3**	128, 73, 227	Illustration and charts only	New step
700	**lavender-700** `--fk-lavender-700`	**#6634BD**	102, 52, 189	Illustration and charts only	New step
800	**lavender-800** `--fk-lavender-800`	**#4D2793**	77, 39, 147	Illustration and charts only	New step
900	**lavender-900** `--fk-lavender-900`	**#361A6A**	54, 26, 106	Illustration and charts only	New step

Lime (Accent 1)

The original "Accent 1 – Yellow" #DAD05A is folded into this family as **lime-400**, used for lime borders and hover. Lime is a fill only: never use it as text, and always put #130438 text on it.

Swatch	Token	Hex	RGB	Usage	Source
50	**lime-50** `--fk-lime-50`	**#F9FFDF**	249, 255, 223	Very light highlight tint	New step
100	**lime-100** `--fk-lime-100`	**#EFFF94**	239, 255, 148	**Accent fill**: badges, accent button on dark bands (`--fk-accent`)	**Original: Accent 1 Lime**
200	**lime-200** `--fk-lime-200`	**#EAF17D**	234, 241, 125	Accent hover (`--fk-accent-hover`)	New step
300	**lime-300** `--fk-lime-300`	**#E3E26D**	227, 226, 109	Illustration	New step
400	**lime-400** `--fk-lime-400`	**#DAD05A**	218, 208, 90	Lime borders, hover, illustration shading (`--fk-accent-strong`)	**Original: Accent 1 Yellow**
500	**lime-500** `--fk-lime-500`	**#BEB542**	190, 181, 66	Illustration and charts only	New step
600	**lime-600** `--fk-lime-600`	**#9E9621**	158, 150, 33	Illustration and charts only	New step
700	**lime-700** `--fk-lime-700`	**#7F7800**	127, 120, 0	Illustration and charts only	New step
800	**lime-800** `--fk-lime-800`	**#605B00**	96, 91, 0	Illustration and charts only	New step
900	**lime-900** `--fk-lime-900`	**#433F00**	67, 63, 0	Illustration and charts only	New step

03 Neutral colours

Purple-tinted neutrals (hue ≈ 298) give a consistent, readable foundation. White, Light Grey, Dark Grey and Black are kept exactly from the original.

Swatch	Token	Hex	RGB	Usage	Source
0	**neutral-0** `--fk-neutral-0`	**#FFFFFF**	255, 255, 255	Page background, cards (`--fk-bg`, `--fk-surface`)	**Original: White**
50	**neutral-50** `--fk-neutral-50`	**#F7F6FA**	247, 246, 250	Subtle page sections (`--fk-bg-subtle`)	New step
100	**neutral-100** `--fk-neutral-100`	**#EDEAF3**	237, 234, 243	Disabled background (`--fk-disabled-bg`)	**Original: Light Grey**
200	**neutral-200** `--fk-neutral-200`	**#DCD9E2**	220, 217, 226	Default borders, dividers (`--fk-border`)	New step
300	**neutral-300** `--fk-neutral-300`	**#BFBCC7**	191, 188, 199	Strong borders, input outlines (`--fk-border-strong`)	New step
400	**neutral-400** `--fk-neutral-400`	**#9D99A6**	157, 153, 166	Icons, placeholders, disabled only. **Never text**	New step
500	**neutral-500** `--fk-neutral-500`	**#827D8D**	130, 125, 141	Disabled label on disabled bg (`--fk-disabled-fg`)	New step
600	**neutral-600** `--fk-neutral-600`	**#6B6677**	107, 102, 119	Muted text, captions (`--fk-text-muted`)	New step
700	**neutral-700** `--fk-neutral-700`	**#4D485A**	77, 72, 90	**Body text** (`--fk-text-secondary`)	**Original: Dark Grey**
800	**neutral-800** `--fk-neutral-800`	**#322C40**	50, 44, 64	Dark UI elements, strong secondary text	New step
900	**neutral-900** `--fk-neutral-900`	**#1B132A**	27, 19, 42	Strong UI text, labels (`--fk-text-primary`)	New step
950	**neutral-950** `--fk-neutral-950`	**#050011**	5, 0, 17	Near-black; maximum-contrast details only	**Original: Black**

Changed from the original: the untinted "Grey" #9B9B9D (2.77:1 on white, fails as text) is replaced by neutral-400 #9D99A6, which is for icons, placeholders and disabled states only. The lightest allowed text colour is neutral-600 #6B6677.

04 Semantic colours

Feedback colours for success, errors, warnings and information. Every family uses the same steps: **50** banner tint, **200** border, **500** the original base (icons and charts only), **600** solid fill with white text, **700** text, **900** the original dark value. Use semantic colours only when the meaning matches the message.

Success

Swatch	Token	Hex	RGB	Usage	Source
50	success-50 `--fk-success-50`	#F2FFF3	242, 255, 243	Banner and background tint (`--fk-success-bg`)	Original: Success 10
100	success-100 `--fk-success-100`	#E3F7E4	227, 247, 228	Chips, light tint	New step
200	success-200 `--fk-success-200`	#C3EAC5	195, 234, 197	Borders (`--fk-success-border`)	New step
300	success-300 `--fk-success-300`	#91D994	145, 217, 148	Chips, borders, charts	New step
500	success-500 `--fk-success-500`	#0FB21D	15, 178, 29	Icons, charts, illustration. **Not text**	Original: Success base
600	success-600 `--fk-success-600`	#008816	0, 136, 22	Solid fills with white text, icons (`--fk-success-solid`, `--fk-success-icon`)	New step
700	success-700 `--fk-success-700`	#006C12	0, 108, 18	**Text and foreground** (`--fk-success-fg`)	New step
900	success-900 `--fk-success-900`	#125C19	18, 92, 25	Strong dark emphasis (`--fk-success-strong`)	Original: Success 100

Error

Swatch	Token	Hex	RGB	Usage	Source
50	error-50 `--fk-error-50`	#FFF8F8	255, 248, 248	Banner and background tint (`--fk-error-bg`)	New step
100	error-100 `--fk-error-100`	#FFEBEB	255, 235, 235	Chips, light tint	Original: Error 10
200	error-200 `--fk-error-200`	#FFD1D0	255, 209, 208	Borders (`--fk-error-border`)	New step
300	error-300 `--fk-error-300`	#FFAAA7	255, 170, 167	Chips, borders, charts	New step
500	error-500 `--fk-error-500`	#C71010	199, 16, 16	Icons, charts, illustration. **Not text**	Original: Error base
600	error-600 `--fk-error-600`	#B40706	180, 7, 6	Solid fills with white text, icons (`--fk-error-solid`, `--fk-error-icon`)	New step
700	error-700 `--fk-error-700`	#970400	151, 4, 0	**Text and foreground** (`--fk-error-fg`)	New step
900	error-900 `--fk-error-900`	#5C1B12	92, 27, 18	Strong dark emphasis (`--fk-error-strong`)	Original: Error 100

Warning

Swatch	Token	Hex	RGB	Usage	Source
50	warning-50 `--fk-warning-50`	#FFF8F2	255, 248, 242	Banner and background tint (`--fk-warning-bg`)	Original: Warning 10
100	warning-100 `--fk-warning-100`	#FDEDDF	253, 237, 223	Chips, light tint	New step
200	warning-200 `--fk-warning-200`	#F8D7BD	248, 215, 189	Borders (`--fk-warning-border`)	New step
300	warning-300 `--fk-warning-300`	#F3B589	243, 181, 137	Chips, borders, charts	New step
500	warning-500 `--fk-warning-500`	#DC680F	220, 104, 15	Icons, charts, illustration. **Not text**	Original: Warning base
600	warning-600 `--fk-warning-600`	#BD5900	189, 89, 0	Solid fills with white text, icons (`--fk-warning-solid`, `--fk-warning-icon`)	New step
700	warning-700 `--fk-warning-700`	#964700	150, 71, 0	**Text and foreground** (`--fk-warning-fg`)	New step
900	warning-900 `--fk-warning-900`	#5C3212	92, 50, 18	Strong dark emphasis (`--fk-warning-strong`)	Original: Warning 100

Information

Swatch	Token	Hex	RGB	Usage	Source
50	info-50 `--fk-info-50`	#F2FDFF	242, 253, 255	Banner and background tint (`--fk-info-bg`)	Original: Info 10
100	info-100 `--fk-info-100`	#E3F4F7	227, 244, 247	Chips, light tint	New step
200	info-200 `--fk-info-200`	#C4E5EC	196, 229, 236	Borders (`--fk-info-border`)	New step
300	info-300 `--fk-info-300`	#93CFDF	147, 207, 223	Chips, borders, charts	New step
500	info-500 `--fk-info-500`	#0BA2C4	11, 162, 196	Icons, charts, illustration. **Not text**	Original: Info base
600	info-600 `--fk-info-600`	#00809A	0, 128, 154	Solid fills with white text, icons (`--fk-info-solid`, `--fk-info-icon`)	New step
700	info-700 `--fk-info-700`	#00667A	0, 102, 122	**Text and foreground** (`--fk-info-fg`)	New step
900	info-900 `--fk-info-900`	#124E5C	18, 78, 92	Strong dark emphasis (`--fk-info-strong`)	Original: Info 100

Error note: the original Error 10 #FFEBEB is kept as error-100. A lighter error-50 #FFF8F8 is the banner background so all four banners have the same visual weight.

05 Application guidelines

Rules for using the palette in the FamilyKit app and on the website.

Do / Don't

DO	DON'T
Use **one primary button colour**: primary-700 #4A13B7 at rest, #2D0B84 on hover, #21025E when pressed. One primary action per view.	Don't introduce a second button colour (lavender, lime-on-white or Main #2D0B84 at rest). It competes with the primary action.
Use neutral-600 #6B6677 or darker, or primary-600 #7543C7 or darker, for text on white and light tints.	Never use **neutral-400 #9D99A6** or the **semantic base colours** (#0FB21D, #DC680F, #0BA2C4, #C71010) as text on white. Use the 700 step (-fg) instead.
Text on lime is **always #130438** (primary-950), 17.6:1.	Never put white text on lime (1.08:1), and never use lime or yellow as text.
Pair every status colour with an icon and a clear label; underline links in body copy.	Don't rely on colour alone to show meaning, state or errors.
Limit bright accents: at most one lime element (badge or accent button) and one lavender highlight per view.	Don't place several bright accent fills side by side or use them behind long text.
Headings in #2D0B84, body in #4D485A, strong UI text in #1B132A. Dark bands: #130438 with white text, secondary text in primary-200 #D9D0F3.	Don't use mid-ramp purples (400–500) or lavender-400 for text; they fail contrast.
Use role tokens (`--fk-...`) in components; show a 3px lavender-500 focus ring with a 3px white gap.	Don't hard-code hex values in components or remove focus outlines.

Contrast and accessibility (WCAG 2.2)

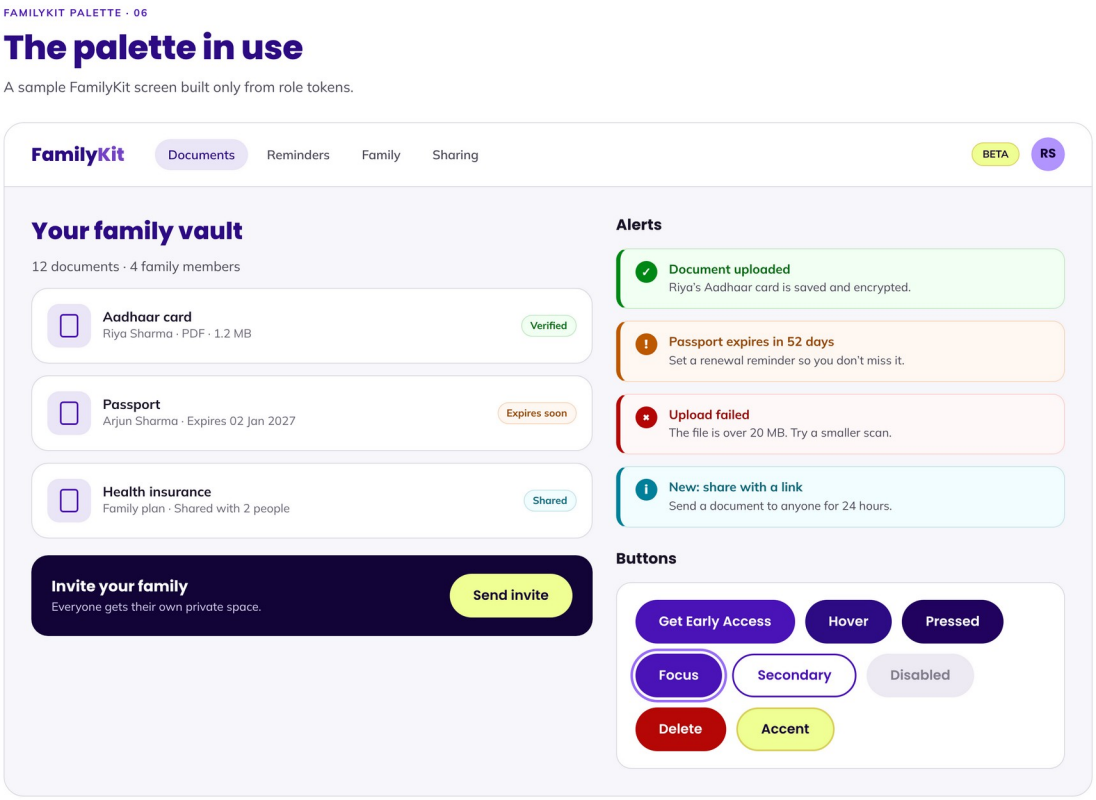

Ratios for the key pairs. AA needs 4.5:1 for normal text (3:1 for large text and UI parts such as focus rings); AAA needs 7:1. Values match palette.json/PALETTE.md.

Pair (foreground on background)	Sample	Ratio	AA	AAA	Use
Heading #2D0B84 on white	Aa	14.07:1	Pass	Pass	Headings
Strong text #1B132A on white	Aa	17.90:1	Pass	Pass	Labels, UI text
Body #4D485A on white	Aa	8.79:1	Pass	Pass	Body copy
Muted #6B6677 on white	Aa	5.54:1	Pass	Fail	Captions (lightest text)
Link #4A13B7 on white	Aa	10.15:1	Pass	Pass	Links
White on button #4A13B7	Aa	10.15:1	Pass	Pass	Primary button
White on hover #2D0B84	Aa	14.07:1	Pass	Pass	Button hover
White on dark band #130438	Aa	19.05:1	Pass	Pass	Dark sections
#D9D0F3 on dark band #130438	Aa	12.94:1	Pass	Pass	Secondary text on dark

Pair (foreground on background)	Sample	Ratio	AA	AAA	Use
#130438 on lime #EFFF94	Aa	17.60:1	Pass	Pass	Accent button, badges
Focus ring #996DF8 on white	Aa	3.56:1	Pass (UI)	n/a	Focus ring (non-text)
Success text #006C12 on #F2FFF3	Aa	6.46:1	Pass	Fail	Banner text
Error text #970400 on #FFF8F8	Aa	8.59:1	Pass	Pass	Banner text
Warning text #964700 on #FFF8F2	Aa	6.24:1	Pass	Fail	Banner text
Info text #00667A on #F2FDFF	Aa	6.37:1	Pass	Fail	Banner text
White on success fill #008816	Aa	4.63:1	Pass	Fail	Solid status button/chip
White on error fill #B40706	Aa	7.06:1	Pass	Pass	Solid status button/chip
White on warning fill #BD5900	Aa	4.57:1	Pass	Fail	Solid status button/chip
White on info fill #00809A	Aa	4.61:1	Pass	Fail	Solid status button/chip
Disabled #827D8D on #EDEAF3	Aa	3.35:1	Exempt	Exempt	Disabled controls
NOT ALLOWED FOR TEXT					
Grey #9D99A6 (neutral-400) on white	Aa	2.78:1	Fail	Fail	Icons, placeholders only
Success base #0FB21D on white	Aa	2.84:1	Fail	Fail	Icons, charts only
Info base #0BA2C4 on white	Aa	3.01:1	Fail	Fail	Icons, charts only
Warning base #DC680F on white	Aa	3.48:1	Fail	Fail	Icons, charts only
White on lime #EFFF94	Aa	1.08:1	Fail	Fail	Never
Lime-400 #DAD05A on white	Aa	1.60:1	Fail	Fail	Borders only

The palette in use

A sample FamilyKit screen built only from the role tokens: navigation, cards, status banners and all button states.

Final decisions applied

- **Button colour stays primary-700 #4A13B7.** Main #2D0B84 (primary-800) is used for headings and button hover; primary-900 #21025E for pressed.
- **Yellow #DAD05A is folded into lime as lime-400**, used for lime borders and hover.
- **Original "75" #3D2184 and "25" #AC9FCC are dropped** and replaced by the even primary ramp.
- **Clear feedback:** green = success, red = error, cyan = information, orange = warning, each with an accessible text (700) and fill (600) step.

06 Typography

The final, founder-approved type system. **The mobile app is the main product**, so app sizes are the primary scale; website sizes follow. **Two fonts only: Poppins** for hierarchy and actions (screen titles, headings, buttons, tabs, amounts) and **Mulish** for reading (body text, labels, captions, helper text). This document itself is set in the same two fonts.

Font note: the PDF embeds both fonts. The .docx names them but cannot embed Google Fonts; install the static Poppins and Mulish files (Regular, Medium, SemiBold, Bold) or Word / LibreOffice will substitute a fallback font.

The two brand fonts

Aa Aa

Poppins

HIERARCHY AND ACTIONS

₹12,450 0123456789

- Titles, headings, buttons, tabs, nav labels, ₹ amounts, stats, dates.
- Google Fonts; load 400, 500, 600, 700. 600 is the workhorse; 700 for the website H1 only.
- Includes ₹ (checked in the font files). Figures are proportional, so right-align amount columns.

Aa Aa

Mulish

READING

₹12,450 0123456789

- Body text, descriptions, form labels, captions, helper text.
- Google Fonts; load 400, 500, 600, 700. Body 400, labels and captions 600.
- Includes ₹; figures are tabular by default. Never use weights under 400.

Type scale: app first

App is the primary column (mobile app screens and PWA, 390px-class phones). Website desktop applies from 768px up, website mobile at max-width 767px. Sizes in px; app line heights after the slash. 1px = 0.75pt in print.

Role	Font	App (primary)	Web desktop	Web mobile	Colour	Usage
Screen title / H1	**Poppins 600 (web H1 700)**	**24px / 32**	56px	32px	**#2D0B84**	One per screen or page.
Section heading / H2	**Poppins 600**	**20px / 28**	40px	28px	**#2D0B84**	Section titles on a screen.
Card & list title / H3	**Poppins 600**	**16–18px / 24**	22px	18px	**#1B132A or #2D0B84**	Card titles, list items. 16px in dense lists.
Body	**Mulish 400**	**15px / 22 long reading 16px / 24**	16px	15px	**#4D485A**	Paragraphs, descriptions. Web line-height 1.6.
Buttons and tabs	**Poppins 500–600**	**14–15px**	15px (small 14px)	15px	**White on #4A13B7**	Buttons 600; tabs 500, active 600 in #2D0B84.

Role	Font	App (primary)	Web desktop	Web mobile	Colour	Usage
Bottom nav labels	**Poppins 500**	**12px**	n/a	n/a	**#6B6677, active #4A13B7**	App tab bar, under the icon.
Labels, captions, helper text	**Mulish 600**	**12–13px**	13px / 12px	13px / 12px	**#6B6677**	Form labels 13px, captions 12px. 12px is the minimum.
Amounts, stats, dates	**Poppins 600 + tabular-nums**	**Per role**	Per role	Per role	**#1B132A or #2D0B84**	₹ amounts, counts, dates. Right-align in lists.

Website line heights: H1 1.1, H2 1.2, H3 1.3, body 1.6, labels 1.4. Heading tracking 0 to –0.5%; uppercase 12px labels +6%. Minimum text size anywhere is 12px.

Live specimens

Each line is set in the actual font, weight and colour for its role, at the app size unless marked (px × 0.75 = pt).

Screen title / H1 Poppins 600 · 24px / 32 · #2D0B84	**Your family**
Website H1 Poppins 700 · 56px desktop / 32px mobile	**Your family, organised.**
Section heading / H2 Poppins 600 · 20px / 28 · #2D0B84	**Upcoming renewals**
Card & list title / H3 Poppins 600 · 16–18px / 24	**Car insurance renewal** **Passport · Riya Sharma**
Body Mulish 400 · 15px / 22 · #4D485A	Keep every important document for your family in one secure place, and get a gentle reminder before anything expires. Long reading, 16px / 24: renewal guides, help articles and policy summaries.
Buttons and tabs Poppins 600 button 15px · tabs 500 14px · nav 500 12px	**Save document** Cancel **All** Insurance IDs Bills Home Documents Reminders Family

Labels, captions, helper Mulish 600 · 13px and 12px · #6B6677	Policy number Minimum size 12px: PDF · 1.2 MB · Uploaded 2 days ago
Amounts, stats, dates Poppins 600 · tabular-nums where aligned	**₹12,450 due on 24 Nov 2026** **3 renewals this month**

Numbers, dates and rupee amounts

Both fonts include the ₹ glyph (U+20B9; checked in every Poppins and Mulish weight used here), so amounts never fall back to another font. Set ₹ amounts, stats and dates in **Poppins 600**, and add `font-variant-numeric: tabular-nums` where amounts line up. Poppins digits are proportional and the font has no tabular-figure feature, so tabular-nums has no effect on it: **right-align amount columns** so the last digits line up (Mulish figures are tabular by default).

Car insurance · due 24 Nov 2026	**₹12,450**
Health insurance · due 02 Dec 2026	**₹18,900**
Electricity bill · due 28 Nov 2026	**₹2,310**
Broadband · due 30 Nov 2026	**₹1,179**
Total due this month · 3 renewals	**₹34,839**

₹12,450 Poppins 600 ₹12,450 Mulish 400 ₹12,450 Mulish 600

Amounts right-aligned in Poppins 600; descriptions in Mulish 400. The ₹ above is the real glyph from each font.

Mobile rules: text scaling and touch

- **Respect OS text scaling** (iOS Dynamic Type, Android font size). Never disable it; every screen must still work at **130% font scale**.
- Let text wrap: use min-height, not fixed heights, on rows, inputs and buttons; avoid truncating titles and amounts. On the web, sizes are in rem so browser text settings apply.
- **Tap targets 44–48px** (48px preferred) regardless of text size, including small text links, tabs and nav items.
- Form input text is Mulish 400 at 16px; smaller input text makes iOS Safari zoom the page.
- **Never below 12px**, and **no Mulish weights under 400**: the thin weights look faint on phone screens.

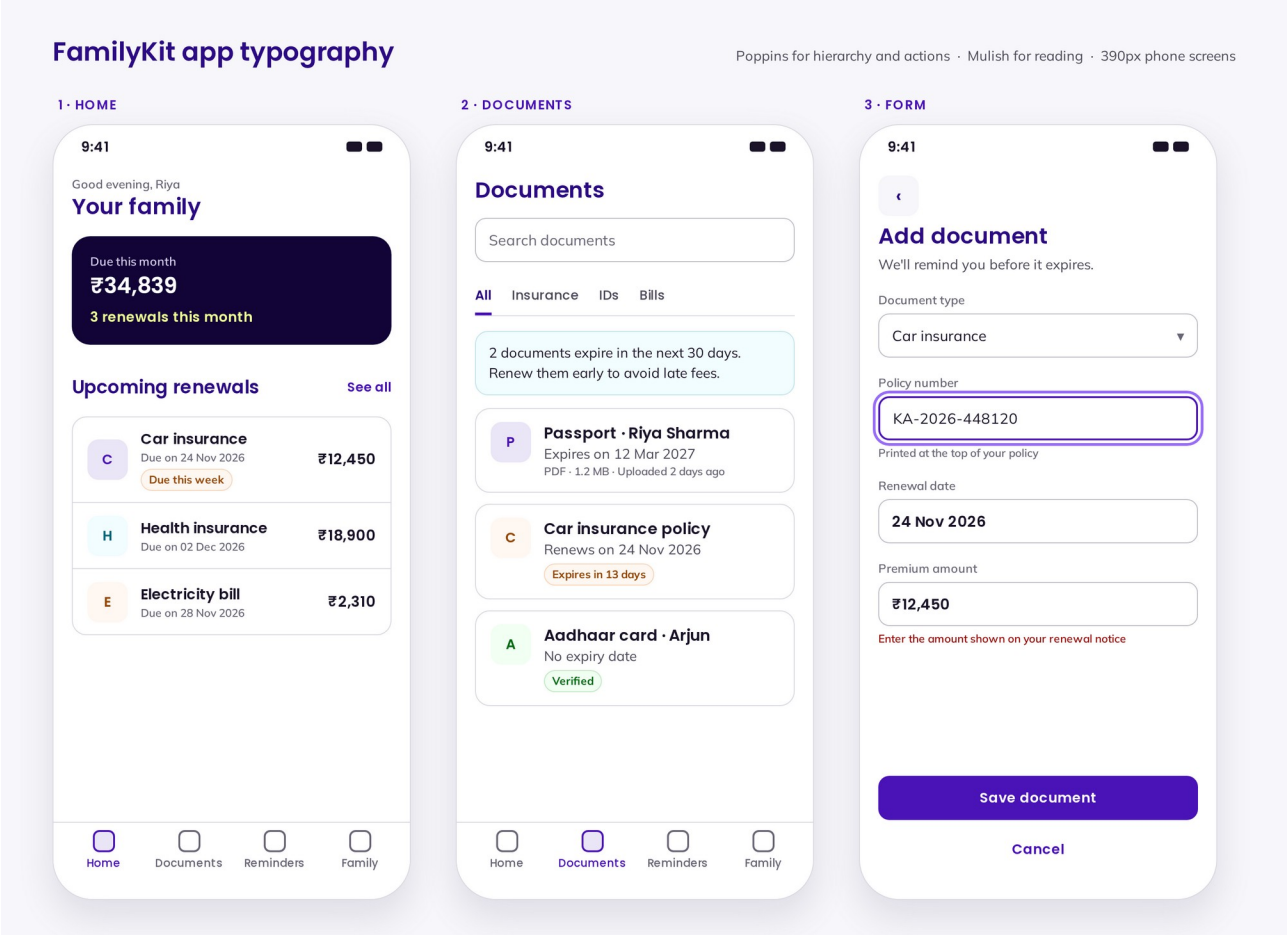

Typography do / don't

DO	DON'T
Use **Poppins for hierarchy and actions**: screen titles, headings, buttons, tabs, nav labels, ₹ amounts, stats and dates.	Don't set paragraphs, descriptions or helper text in Poppins.

DO	DON'T
Use **Mulish for reading**: body 400 at 15px in the app (16px for long reading), labels and captions 600 at 12–13px.	Don't use **Mulish weights under 400** (ExtraLight 200, Light 300); they look thin on phones.
Keep every piece of text at **12px or larger**; captions and helper text in muted #6B6677.	Don't go below 12px, or use colours lighter than #6B6677 for small text.
Respect OS text scaling and test every screen at **130% font scale**; let text wrap.	Don't fix the height of text containers, or block zoom (no `user-scalable=no` / `maximum-scale=1`).
Keep **tap targets 44–48px** whatever the text size; right-align ₹ amount columns in Poppins 600.	Don't shrink a button or tab because its label is short or small.
Load just the two families from Google Fonts with `display=swap`, and use the `--fk-font-*` and size tokens in components.	Don't add a third font family or hard-code font sizes in components.

Typography in use: app screens

Three 390px FamilyKit phone screens (Home with upcoming renewals and amounts, a document card list, and a form with labels, helper text and a primary button), built with the app type scale and the final colours (source: html/07-typography.html, rendered at 2×).

Appendix A Colour CSS variables

File: `familykit-colours.css`

Copy-paste ready. Identical to `tokens.css` / `familykit-colours.css` delivered with this document. Long lines wrap on the page but paste as single lines.

```

Note: these hex values were refined from the image-sampled originals in the first colour document and should be checked against Figma if a master file exists.

Appendix B Typography CSS

File: `familykit-typography.css`

1. Load the fonts in the page <head>, before the stylesheet (Poppins 400–700 and Mulish 400–700; display=swap):

```
<link rel="preconnect" href="https://fonts.googleapis.com">
<link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
<link href="https://fonts.googleapis.com/css2?
family=Poppins:wght@400;500;600;700&family=Mulish:wght@400;500;600;700&display=swap"
rel="stylesheet">
```

2. Typography tokens and base styles. Identical to `familykit-typography.css`. App tokens (`--fk-app-*`) come first; website tokens follow, with the mobile query at max-width 767px. Sizes are in rem (px in comments) so OS and browser text scaling is respected. `familykit-brand.css` combines `familykit-colours.css` and this file in one stylesheet.

```
/* FamilyKit typography tokens v1.2 Final (2026-11-11). Founder-approved final type
system, mobile app first.
   Two fonts only: Poppins (hierarchy and actions: screen titles, headings, buttons,
tabs, amounts, stats, dates)
   and Mulish (reading: body text, labels, captions, helper text). Both fonts include
the ₹ glyph.

   Load the fonts in <head> (before this stylesheet):
   <link rel="preconnect" href="https://fonts.googleapis.com">
   <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
   <link href="https://fonts.googleapis.com/css2?
family=Poppins:wght@400;500;600;700&family=Mulish:wght@400;500;600;700&display=swap"
rel="stylesheet">

   Rules: Poppins for hierarchy and actions, Mulish for reading. Never below 12px. No
Mulish weights under 400
   (it looks thin on phones). Sizes are in rem (1rem = 16px; px in comments) so OS /
browser text scaling is respected:
   layouts must survive 130% font scale. Tap targets stay 44-48px whatever the text
size.
   Note: Poppins has proportional figures and no 'tnum' feature, so tabular-nums has no
effect on Poppins:
   right-align amount columns. Mulish figures are tabular by default. */
